                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Rot = 100.0. Second strand cDNA was prepared with the primer adapter of sequence [5' adapta and XhoI. cDNA of size comprised longer than 7 kb was selected before cloning. Vector: a modified pBluescript KS(+) after bulk excision from Lambda FLC I. Cloning sites, 5' end: SalI; 3'
